--> Comment Text :
Nuclear technology and nuclear power are required to maintain a strong America. The Yucca Mountain site was selected years ago for disposal of the waste from the power plants. This selection was, in part, directed by the anti-nuclear groups that did not want us to recycle the nuclear fuel. Now they don't want the spent fuel disposed of at the selected site. Please recognize that their goal is to prevent America from using nuclear power and technology.

Please recommend to the President that Yucca Mountain is a suitable site for disposal. If the long lifetime of the radioactivity from the spent fuel is an issue, we have transmutation technology that can reduce site lifetime requirements. Also, recycling technology can reduce the volume requirements. I strongly support nuclear power and expect the USDOE to do what it takes for America to take advantage of the atom.

Thank you,

Ken Dobbin, Councilman
City of West Richland, WA
